"It was a delight to work with and to learn from my fellow PISCES mentors as we engaged with and understood more about biodiversity and (green-blue) enterprises (to) make a positive impact in our communities. Also, during these past two and a half years, the support from CANARI was exceptional." – Raquel Beneby-Hart, The Bahamas

In 2018, Raquel Beneby-Hart became a PISCES mentor to East Grand Bahama Fly Fishermen; coordinated by Captain Phillip Thomas of Captain Phil and Mel's Bonefishing Guide Service (Captain Phil and Mel's).

As a mentor, Raquel supported the East Grand Bahama Flying Fishing Community organisation to strengthen their organisation through a tailored programme of training, mentoring, coaching, action learning and facilitating peer exchanges. Ultimately, this will support and enhance their contribution to conservation of marine and coastal biodiversity and development of sustainable and resilient livelihoods in the Caribbean.

Raquel is an experienced International Business Development Strategist who has worked in the management consulting industry. She is the holder of a Certificate of Completion focused in Business Strategy, Financial Management and Export Marketing from ProNet Training, sponsored by the Caribbean Export Development Agency.

The PISCES project is funded by the European Union (ENV/2016/380-530) *Civil society and small and micro enterprise innovation for marine and coastal conservation in the Caribbean*. It is being implemented by the Caribbean Natural Resources Institute (CANARI) in partnership with the Caribbean Coastal Area Management Foundation (C-CAM), the Caribbean Network of Fisherfolk Organisations (CNFO), the Environmental Awareness Group (EAG), and the Fondation pour la Protection de la Biodiversité Marine (FoProBiM), the Saint Lucia National Trust (SLNT) and Sustainable Grenadines Inc (SusGren).
