

Fostering knowledge sharing and collaboration for Caribbean resilience and sustainability

Port of Spain, 28 June 2024 – In 2023, the Caribbean Natural Resources Institute (CANARI) expanded its outreach and community engagement by launching two online platforms aimed at strengthening environmental stewardship and sustainable development efforts across the Caribbean. More than just repositories for information, the Caribbean Resilience Knowledge Platform and the Caribbean Local Green-Blue Enterprises (LGEs) Knowledge Platform are dynamic hubs where individuals, communities and organisations can come together to share knowledge, ideas and solutions. We invite you to explore these platforms to contribute your insights and join the collective effort towards a resilient and sustainable Caribbean future.

Caribbean Resilience Knowledge Platform

The [Caribbean Resilience Knowledge Platform](#) is an online hub that supports knowledge sharing, learning and collaboration among civil society organisations and their public and private sector partners to scale up action for climate justice and resilience across the region.

Whether it's data on climate patterns, case studies on successful adaptation projects, or toolkits for community resilience planning, this platform provides a wealth of knowledge for anyone seeking to understand and address the challenges facing the Caribbean region. In addition, it creates a space for dialogue and exchange where innovative ideas can take root and flourish by fostering collaboration among researchers, policymakers, practitioners and citizens.

Caribbean Local Green-Blue Enterprises (LGEs) Knowledge Platform

The [Caribbean Local Green-Blue Enterprises \(LGEs\) Knowledge Platform](#) is an online space that showcases a wide range of enterprises and initiatives that are leading the way in sustainable business practices. From eco-friendly tourism ventures to innovative aquaculture projects, these enterprises demonstrate that profitability and environmental stewardship can go hand in hand. Moreover, the platform provides resources and support for aspiring entrepreneurs, connecting them with mentors, investors and collaborators.

How to get involved

If you are passionate about building resilience, fostering sustainable development, or both, these platforms offer valuable resources and opportunities to make a difference. Here is how you can contribute:

1. **Visit the platforms** to access valuable resources, such as toolkits, guidelines, manuals, case studies and webinars.

2. **Join the communities** and engage with like-minded individuals and organisations through online forums, webinars and networking events.
3. **Contribute your knowledge** by sharing your expertise, research findings and best practices on [resilience-building](#) and [sustainable enterprise development](#) in the Caribbean.

Join the movement to build a more resilient, sustainable and prosperous future for the Caribbean and its people today.

- **About Caribbean Resilience Knowledge Platform:** The development of this platform was led by CANARI, with funding from the Green Climate Fund, the Inter American Foundation and Open Society Foundations. <https://resiliencecanari.org/>
- **About the Caribbean Local Green-Blue Enterprises (LGEs) Knowledge Platform:** This platform was developed under the project 'Civil society participation for sustainable finance reforms: global coverage' funded by the European Union and managed by the Green Economy Coalition. <https://greenenterprisescanari.org/>
